Munich/Marlow May 2016

TSL Products joins RAVENNA partnership community

TSL Products, a leading broadcast equipment manufacturer, has become the latest company to join the growing ranks of the RAVENNA partnership community. Based in the UK, TSL Products designs and manufactures a range of hardware and software solutions to facilitate operations within the TV broadcast, cable, satellite, IPTV and IT industries.

TSL Products launched its first RAVENNA-enabled products at NAB 2016. The MPA (Monitor Plus Audio) range of monitoring products is now available in a version with integrated RAVENNA connectivity. Solo offers the ability to listen to any channel, whilst the Mix model enables the user to create a simple monitoring mix.

Matt Colman, Product Manager, TSL Products, said, “The move to integrating RAVENNA was a logical step in order to remain in sync with the industry’s rapid move to AoIP workflows.”

ALC NetworX RAVENNA evangelist, Andreas Hildebrand is in full agreement. “The move to AoIP is fast becoming a universal trend within the broadcast sector in particular and the audio world in general. Furthermore, as demands on AoIP networks vary in terms of performance and connectivity, manufacturers have to offer a choice of AoIP networking options in order to remain relevant. RAVENNA is necessarily a key element in the range of possibilities offered to customers, particularly as it remains the both the highest-performing networking technology currently available, and the easiest gateway to AES67 interoperability.”

About TSL Products:

TSL Products designs, manufactures and markets a range of hardware and software solutions that serve to simplify operations within the television broadcast, cable, satellite, IPTV and IT industries.

Specialising in audio monitoring, surround microphones and processors, intelligent display systems, broadcast control systems, and power management tools, TSL Products’ solutions satisfy and exceed the commercial, technical and operational requirements that exist in IT-based and traditional workflows, helping its customers to lower costs, generate revenue and streamline operations.

TSL Products draws on over two decades of international systems integration experience to develop and deliver a range of top-quality products that meet the needs of today’s broadcasters.

About RAVENNA:

RAVENNA is a technology for real-time distribution of audio and other media content in IP-based network environments. Utilizing standardized network protocols and technologies, RAVENNA can operate on existing network infrastructures. RAVENNA is designed to meet the strict requirements of the pro audio market featuring low latency, full signal transparency and high reliability.

While primarily targeting the professional broadcast market, RAVENNA is also suitable for deployment in other pro audio market segments like live sound, install market and recording. Possible fields of application include (but are not limited to) in-house signal distribution in broadcasting houses, theaters, concert halls and other fixed installations, flexible setups at venues and live events, OB van support, inter-facility links across WAN connections and in production & recording applications.

Unlike most other existing networking solutions, RAVENNA is an open technology standard without a proprietary licensing policy. RAVENNA is fully compatible with the AES67-2013 standard on *High-performance Streaming Audio-over-IP Interoperability*.

About ALC NetworX GmbH:

ALC NetworX is an R&D company in Munich, Germany. A team of experts with excellent reputation from the Pro Audio industry and in-depth knowledge in networking technologies has developed the RAVENNA technology platform. While ALC NetworX will continue to keep the lead role in the RAVENNA technology development, product implementations will be executed by individual partner companies. Current partner companies include 2wcom, AEQ, AETA, Archwave, ARG, arkona, Axia, Boldburg, Calrec, Cordial, CoveloZ, Digigram, Dimetis, DirectOut, DSA Volgmann, GatesAir, Genelec, Infomedia, Jutel, Lawo, Linear Acoustic, LSB, Luminex, Meinberg, Merging, Modulation Index, MTS, Neumann, Omicron Lab, Omnia, Orban, Qbit, Riedel, Schoeps, SCISYS, Sennheiser, Sonifex, Sound4, Telos, Ward-Beck and WorldCast Systems. Interested manufacturers are welcome to join the RAVENNA partner community.
